

D3
C3 34. (Amended) The method of claim 33 wherein the cell is exposed to the antibody [which binds to Domain 1 of ErbB2] that cross-blocks binding of antibody 7C2 or antibody 7F3 to ErbB2 before the cell is exposed to the second antibody.

D4
C4 42. (Amended) A method for inducing cell death comprising exposing a cell which overexpresses ErbB2 to an effective amount of a composition comprising an antibody [which binds to Domain 1 of ErbB2] that cross-blocks binding of antibody 7C2 or antibody 7F3 to ErbB2 and a pharmaceutically acceptable carrier, wherein the antibody results in about 5 to 50 fold induction of annexin binding relative to untreated cell in an annexin binding assay using BT474 cells.

D5
C5 58. (Amended) A method for inducing cell death comprising:
exposing a cell that overexpresses ErbB2 to a first antibody that [binds to Domain 1 of ErbB2] cross-blocks binding of antibody 7C2 or antibody 7F3 to ErbB2; and
subsequently exposing the cell to a second antibody that binds to a domain of ErbB2 other than [Domain 1 of ErbB2] the binding site of antibody 7C2 or antibody 7F3.

REMARKS

RELATED CASE STATEMENT

Applicants attach a Related Case Statement to draw the Examiner's attention to related application Serial No. 09/266,706, filed March 11, 1999, which claims priority to application Serial No. 07/705,256, filed May 24, 1991.
